SUMMARY

Full-stack engineer who builds complete products end-to-end, from PostgreSQL schema and REST APIs to Next.js front-ends, with authentication, RBAC, payments, testing and Docker. Since graduating I have worked remotely as a freelancer, designing and building two complete business platforms on my own (100+ endpoints each, 60+ automated test files). Experienced in working independently and asynchronously with clients. Fluent in English and French.

EXPERIENCE

Freelance Full-Stack Developer — Self-employed (remote, client projects) Feb 2026 – Present

ESN Resource Manager: platform for an IT consulting firm · TypeScript, Express, Prisma, PostgreSQL, Next.js 15, Keycloak

- Built a recruitment, staffing and contract-management platform end-to-end: 15 backend modules (~100 REST endpoints), 21 Prisma/PostgreSQL models and a 34-page Next.js 15 / React 19 app.
- Implemented Keycloak OIDC authentication with 4-role RBAC, audit logging, and a multi-step contract approval workflow (HR → Manager → Direction) with generated PDFs. Documents are stored in S3-compatible storage (MinIO).
- Wrote 66 test files (Vitest, Supertest integration, Playwright e2e). Added AI-assisted candidate evaluation (Claude API) and a rate-limited public job-application portal.

FinanceOS: multi-tenant personal & business finance SaaS · Java 21, Spring Boot 3.5, PostgreSQL, Redis, Next.js 16

- Designed a multi-tenant Spring Boot backend: ~130 REST endpoints across 21 modules, 26 JPA entities, 30 Flyway migrations, and Redis-backed rate limiting and token revocation.
- Implemented JWT auth with TOTP two-factor login, role/permission RBAC, audit logs, Stripe subscription billing with webhooks, and transactional email.
- Built bank CSV import with hybrid rule + LLM transaction categorization, a tax calculation engine and an AI financial advisor, covered by 390+ JUnit 5 / Testcontainers tests.

Software Engineering Intern — Key Object May 2025 – Oct 2025 · Tunis

- Fine-tuned a Flan-T5 model with LoRA/PEFT to extract structured fields from résumés (80%+ accuracy on skills and education) and served it as a REST endpoint inside the company's ERP recruitment module.
- Built a Django recruitment dashboard with a candidate-scoring algorithm, reducing manual screening time by about 60%.

Full-Stack Developer Intern — IPACT Jun 2024 – Aug 2024 · Tunis

- Delivered project-management modules (Spring Boot + Angular) with KPI dashboards and archival workflows; optimized MongoDB archival queries.
- Set up Jenkins pipelines for automated build, test and deploy, replacing manual releases.

Software Developer Intern — Devzone International Jul 2023 – Aug 2023 · Tunis

- Customized Odoo ERP modules in Python for client-specific business needs; handled deployments and maintenance.

SELECTED PROJECTS

- **Multi-Tenant SaaS Starter** (NestJS, PostgreSQL row-level security, Docker, CI): Tenant isolation enforced in the database. argon2id hashing, rotating refresh tokens with reuse detection, and a least-privilege DB role. GitHub
- **AI SaaS Platform** (Next.js, TypeScript, Prisma, Stripe): 10 AI tools (chat, image, voice, code) with authentication, Stripe billing and usage metering. Live demo
- **MedVR Telemedicine** (React, Node.js, WebRTC, Socket.IO, Solidity): Real-time video consultations, with medical-record access secured by Ethereum smart contracts.

SKILLS

Languages	TypeScript, JavaScript, Java 21, Python, SQL
Backend	Node.js, NestJS, Express, Spring Boot 3, Django · REST, OpenAPI/Swagger · Prisma, JPA/Hibernate
Frontend	React 19, Next.js 15/16, Angular, TanStack Query, Tailwind CSS, shadcn/ui
Data & Auth	PostgreSQL, MongoDB, MySQL, Redis, Flyway, S3/MinIO · Keycloak/OIDC, JWT, 2FA, RBAC, Stripe
Testing	Vitest, JUnit 5, Testcontainers, Supertest, Playwright
DevOps	Docker, Docker Compose, GitHub Actions, Jenkins, SonarQube
AI	Claude & OpenAI APIs, Hugging Face, LoRA/PEFT fine-tuning

EDUCATION & LANGUAGES

Engineering Degree in Computer Science (Diplôme d'Ingénieur, Master's-level) — **ESPRIT**, Tunis 2026

Specialization: Full-Stack Development · **Languages:** English (fluent), French (fluent), Arabic (native)
